

TimeTrax^{pro}

KEEP YOUR GROWING BUSINESS RUNNING ON TIME.

The Pyramid **TimeTrax Pro** Time and Attendance system's easy plug-and-play installation allows your company to grow from a single terminal to a multi-terminal system. The included software, designed for Microsoft Windows®, is extremely easy to use. It comes with many features, including variable pay rates and pay periods, along with unlimited departments. **TimeTrax Pro** lets you export to most major payroll systems such as QuickBooks, ADP, PAYCHEX, and many more.

TimeTrax Pro allows for many options, including synchronized digital or analog wall clocks and bell/horn systems. This unique feature lets you sync all the clocks and employees in your facility to the same master system clock time. This will assure that everyone in the workplace is on the same time schedule – saving your company money. An added feature that the **TimeTrax Pro** brings is a numeric keypad for manually entering employee identification numbers. The keypad also allows for department/job transferring that lets employees (at different pay rates) move throughout the office.

All of these features make the **TimeTrax Pro** the ideal solution for managing your employees' time, attendance, and payroll right from one centrally located computer.

- Eliminates paper time cards and ink
- Employee shift rounding up or down
- Ideal for small to mid size businesses

Pyramid
Time Keeping Made Simple

TimeTrax^{pro}
